### PRESS RELEASE

#### **Local Missouri Company Launches Free Tool to Help Businesses See How They Stack Up Against Competitors**

– New 60-second online report gives small businesses insight into lost revenue, review rankings, and local market position –

**CREVE COEUR, MO — [October 27, 2025]** — A new online tool, launched by a Creve Coeur-based digital marketing team, is helping local businesses across the country understand exactly where they stand in the eyes of customers—and how much it may be costing them. The free tool, available now at [MyReviewReport.com/ezrep](https://myreviewreport.com/ezrep), generates a personalized competitive report in under 60 seconds.

Designed for small business owners and local service providers, the report compares Google reviews, search visibility, and market position to direct competitors. Unlike traditional audit services that can cost hundreds—or even thousands—this tool provides instantly actionable insights at no cost.

“Most local business owners don’t realize how much revenue they’re losing simply by being ranked below a competitor with better reviews,” said the tool’s creator. “We wanted to make this data simple, fast, and free so any business owner can see what’s really going on in their local market.”

The tool is now live and can be accessed by any business, anywhere in the U.S. It takes less than a minute to run and offers clear suggestions on where to focus improvement efforts.
